Experience

Game Developer & Software Engineer | Upwork (Freelancer) Remote | Nov 2022–Present

- Delivered 30+ Unity projects for global clients, completing full life cycles from concept to deployment across varied genres and platforms.
- Architected and developed multiplayer backends using Photon, Mirror, Firebase, and PlayFab, including matchmaking, ranked systems, live ops tooling, and performance/cost optimization.
- Designed and built core gameplay systems for a real-time PvP arena, integrating complex ability interactions and loot distribution.
- Created SDKs, toolkits, and content pipelines, enabling designers to prototype new mechanics without code, accelerating development cycles.
- Delivered commercial platforms, including a web-based game hub integrating dozens of Unity titles via custom APIs and a 3D multi-user shopping experience with live carts and checkout systems.

Senior Game Developer | Forest Knight (Contract) Remote | Dec 2021–Nov 2022

- Contributed to the remake of Forest Knight, a blockchain-based multiplayer play-to-earn game, improving player experience and helping the game reach over 150,000 downloads.
- Rebuilt the multiplayer architecture for scalability and stability, cutting server costs by over 70%.
- Overhauled core gameplay systems, reducing lag, lowering memory usage, and optimizing build size for faster downloads.
- Developed a campaign progression system that streamlined user interactions, enabling tracking of 1,000+ custom events and actions, including unlocking achievements.

Senior Game Developer | Front Tech, LLC (Part-time) Cairo, Egypt | Aug 2021–Sep 2022

- Led and coordinated development of Millionaire Deal, a CCG-style, turn-based card game, from prototype to production, managing gameplay, systems, and infrastructure with a small team using Jira.
- Planned and built core features like card stores, currencies, and 50+ unique animated action cards.
- Collaborated on game design and integrated assets, ensuring visual polish and a cohesive experience.

Intermediate Game Developer | Alamat.tech Cairo, Egypt | Feb 2020–Jul 2021

- Developed scalable real-time multiplayer and ranked matchmaking using Unity and Photon.
- Integrated backend services, including a low-cost, high-performance user management platform.
- Built a Unity asset pipeline with artists and designers, reducing the time to add new features and improving iteration speed.

Junior Game Developer | DASA Studios Cairo, Egypt | Mar 2019–Feb 2020

- Contributed to 10+ games, including card games (Classic, Estimation), board games (Connect Four, Dominoes, Chess), and other mini-games.
- Integrated games with a central hub system for matchmaking, user accounts, and challenges.

Junior Game Developer | NasNav Cairo, Egypt | Jun 2017–Oct 2018

- Developed a real estate app to design, furnish, and share 3D home walkthroughs.
- Built AR/3D apps, including a virtual mall with navigation and a 360° showroom for furniture shopping.

Skills

Engines & Languages:

Unity, Unreal Engine, C#, C++

Networking & Backend:

Mirror, Photon, Firebase, PlayFab, AWS

Tools & Practices:

Git, Blender, Jira, SDK Development, Live Ops, Agile, CI/CD

Education

Benha University — B.Sc. in Computer Science

Benha, Egypt | 2013–2017
